

Machine Shop Night Shift Supervisor

Job Summary

Growing demand for mechanical engineering from clients has led to a requirement for a Night Shift Mechanical Services Supervisor with good experience of manual/conventional Turning, Milling and Boring machines. This is a hands-on, working machinist role managing a small team.

DUTIES WILL INCLUDE:

- Supervise and provide technical support to workshop operatives.
- Ensure that the correct workshop procedures are being carried out on the shop floor.
- Allocate jobs to operatives and monitor and control progress to ensure tasks are completed in line with estimated/quoted times.
- Monitor and inspect all jobs in progress at key stages and prior to delivery; ensure all findings are adequately recorded.
- Ensure material orders and job bookings are passed to the appropriate clerk within normal hours.
- Ensure that PPE is issued and used as appropriate.
- Maintain high levels of workshop cleanliness.
- Ensure that all equipment is safe, in good order and stored in the correct location when not in use.

If you are a resourceful mechanical engineering machinist who thrives on a varied workload, are a proven leader, and are fully trained and experienced on conventional Turning, Milling and/or Borer machines, ideally with experience of mechanical fitting, please apply as we would like to hear from you.

Job Type / Category

This is a great opportunity to work in our long-established, multi-branch electro/mechanical engineering business offering a variety of machining work in our Liverpool workshop, overtime and occasionally on-site work. You will also have opportunities to enhance your skill set with training in electro-mechanical services unique to this business.
