

## Rewinds & J Windsor & Son and RJW Engineering

### Environmental Policy Statement

Rewinds & J. Windsor and RJW Engineering conduct our business activities to reduce where possible its effect on, and in all ways practicable to improve our environment by reducing waste, recycling, and conserving energy where opportunities lie within the business.

#### **This is carried out in the following ways:**

Material Use and Management	the use and quantity of materials and the way they are used are examined and areas where practice or procedure are inefficient wasteful are identified and improved
Waste management and reduction	we aim to reduce any waste we generate by recycling as much as possible and managing waste as effectively as possible
Energy conservation	we are continually looking to reduce our energy costs and introduce initiatives to conserve energy and reduce our carbon footprint
Use of machinery	we have several processes where the use of machinery is more efficient in terms of time and energy whilst being safer for the environment.
Transport	we are constantly looking for ways to reduce the use of vehicles by rationalising journeys and using carriers if more cost effective and efficient. Virtual meetings are actively encouraged
Water Usage	the company aims to reduce water discharge and has a range of parts washers and other cleaning equipment to reduce the use of water and pollution.

Rewinds & J. Windsor regard the safety of the environment as a matter of prime importance, and we will look to continuously improve our performance with respect to the environment
